## Job Description for the role of Operations Manager, Leinster Province, Ireland

### **Company**

Our client's main activity is the production of young plants of ornamental and food crops. They also execute production activities for their sister company, which is focused on developing new plant food crops with exceptional ingredient potential for the European and African food & beverage industry and European hobby markets. Our client operates a long-standing and innovative plant propagation nursery exporting into the global marketplace.

### **The role**

The successful candidate will be a key member of the overall management team and will be responsible for all production, planning, supply chain and cultivation activities, as well as culture of crops in the nursery and grown on behalf of the nursery, and for technical assistance and support to customers. This role provides an excellent platform for the successful candidate to develop their professional profile within the global nursery and broader horticultural marketplace.

### **The Candidate**

- Ethical and responsible behavior
- Drive & determination
- Demonstrates strong initiative and a "right first-time" approach
- Excellent organizational & planning skills
- Communication skills
- Strong execution and delivery capabilities
- People management and teamwork skills
- Project management skills
- Process knowledge, improvement and problem-solving ability
- Excellent Numeracy & PC Skills
- High level of attention to detail
- Knowledge of ERP systems
- Commercial acumen
- Demonstrates autonomy within the established framework and report requirements
- Capability to handle significant workloads, availability to respond and to travel
