For our Zacapa, Guatemala location

## R&D Innovation Manager (Melons & Watermelons)

This role is responsible for overseeing the entire development process of new products and programs within the company, from the initial planning phase to implementation or production. He will need to keep track of all the costs related to the creation of these new products and decide what ideas are worth pursuing. The R&D and Innovation manager should also stay informed on what is happening in the research and development field at large in order to make sure the company is up-to-date and current with the most advanced R&D developments.

### Requirements for the position:

- Planning, manage and coordinate research and development activities, to create procedures, new products, knowledge or ways of using new or improved materials.
- Profound knowledge of technical services of pests and diseases, insect scouting and control.
- Minimum of eight (8) years experience in R&D and Innovation.
- Bachelor's Degree in agriculture or Agricultural Engineering, Master in agricultural or related sciences is preferable.
- Bilingual: English and Spanish.
